

Clinical Simulation Module 1: Adopting Assessment Tools for Simulation

Deborah Rooney, PhD, Associate Professor of Learning Health Sciences and Director of Education and Research for the Clinical Simulation Center for University of Michigan Medical School

1. Watch the provided overview video (24 minutes).
2. Review the related 2 journal articles:
 - Metzner J, et al. (2011). Obstetric bleeding curriculum. MedEdPORTAL,7:8305.
<https://doi.org/10.15766/mep.2374-8265.8305>
 - Brogaard L, et al. Development of the TeamOBS-PPH - targeting clinical performance in postpartum hemorrhage. Acta Obstet Gynecol Scand. 2018 Jun;97(6):677-687
<http://doi.org/10.1111/aogs.13336>.
3. Review the provided 5 steps to adopting assessment tools for simulation.
4. Select 2 possible assessment tools from the provided list of suggested resources.
5. Use the provided handout, "Assignment-Assessment Plan" to draft a personal assessment plan. Write out the steps you used to refine your assessment tool, providing marked-up original tools, and description of your process used to adopt/adapt a performance assessment tool, including a description of the participants you did (or plan) to include in your focus group.
